Nutri-Comp - BMR Silage

### Alfalfa Varieties

Conventional Roughrider

Roundup Ready RR440

A New Choice is Here From **Channel** 

### With Glyphosate, Dicamba, and Glufosinate Tolerance

The next big thing from the Roundup Ready Xtend Crop System is here from the Bayer research pipeline. With a new choice of weed management and the high potential you know and trust, it's designed to meet the needs of your operation. Channel XtendFlex soybeans are tolerant to glufosinate, so you can manage tough-to-control and resistant weeds. XtendFlex soybeans are built on the proven performance of high-yielding Roundup Ready 2 Xtend Technology you already know and trust. So you know you're making a choice with high yield potential.

### Soybean recommendations

#### Roundup Xtend Soybeans-

4317R2X/SR Fullseason or Doublecrop

#### Roundup XtendFlex Soybeans-

**4121RXF/SR** Fullseason or Doublecrop

Broad acre placement variety. SR with strong tolerance to high pH soils. Medium tall plant with good standability. Unique creamy tan color at harvest.

**4320RXF** Fullseason

Bushy plant type with strong yield performance. Watch standability in high yield environments. Strong on high pH.

**4720RXF/SR** Fullseason or Doublecrop

Excellent yield potential with good standability. Good emergence in the Spring.

We have a double crop soybean discount program available on STS soybeans. Also, milo varieties are available for double cropping behind wheat.

With our seed treater, we can customize seed treatments. We strongly recommend fungicide and insecticide on soybeans for disease control. With seed treatment, data shows that replants are 75% less likely. We have seen a 5-15% increase in final stand where seed was treated.

We have several seed tenders available for your use. We are committed to giving you service any time of the day!

# Wheat Seed Varieties Available

With wheat harvest coming up, we need to start planning for next year's wheat varieties to plant this Fall. We will have varieties from all these brands available.
